EXPERIENCE

FRONT-END INTERN OSCENOX

Aug 2023 - Oct 2023
Delhi, IN

- Designed website layout using Figma and developed it from scratch using React.js and UI frameworks like Bootstrap.
- Implemented interactive elements and responsive design to enhance user engagement, ensure mobile-friendliness, and enable seamless navigation across multiple pages.
- Implemented fast rendering by optimizing code and utilizing external file sourcing, resulting in a 20% improvement in website loading times.

SKILLS

Languages: JavaScript, TypeScript, Python

Technologies: React.js, Next.js, Express.js, TensorFlow, Bootstrap, Node.js, No-SQL: MongoDB, Electron.js, FireBase, Tailwind, Figma, Canva, Jira, Git, GitHub

PROJECTS

BLITHE | *React.js, Express.js, Node.js, MongoDB, Linear Regression* | [DEMO LINK](#)

- Blithe is a web-based psychiatrist booking app that allows users to create accounts, log in, and book appointments according to their schedules.
- Integrated a blog page that posts mental health-related articles fetched through an API, providing users with valuable resources and information.
- Implemented a stress level predictor using a machine learning Linear Regression model that analyzes user responses to multiple-choice questions and predicts stress levels in percentage format, with future plans for personalized recommendations based on results.

SAARTHI | *React.js, Express.js, FireBase, Node.js, GeoLocation API* | [DEMO LINK](#)

- Saarthi is a web-based application that enables users to book and track ambulances in real-time, ensuring swift medical assistance during emergencies.
- Integrated GPS tracking and real-time communication to streamline ambulance dispatch and coordination, significantly reducing wait times and improving emergency response efficiency.
- Reduced ambulance booking wait times by 80%, enhancing the overall effectiveness of emergency healthcare services and potentially saving lives through faster response times.

EDUCATION

B.Tech in Information Technology

2020 - 2024

ABES Institute Of Technology, Ghaziabad

ACHIEVEMENTS

- **Design Lead, Bit Brain Club, 2021-2023:** Successfully led the design team, organizing events and workshops, including a notable event with Microsoft Azure, boosting student engagement and skill development.
- **Hackathon Enthusiast:** Participated in multiple hackathons, achieving top finalist status at BVICAM and securing 8th place at HackVSIT Hybrid Hackathon, demonstrating strong problem-solving and technical skills.
- **Research Author:** Conducted research on "Blockchain-Based E-Tendering & Bidding System" and presented the paper at JNU Convention Center during my final year. [CERTIFICATE LINK](#)
